

05/01/2020

Hello-

I feel that I need to say something to you before this year is over. In my many years of employment and working for many employers, I feel extremely grateful to be an employee at NENCAP during this difficult time. You and all your team have taken all of the crisis into consideration and worked hard to keep us safe and protected.

As I hear from my many parents that are working for other employers, I feel very valued as an employee at NENCAP. In turn, I have seen how hard everyone is working to help and support our families. We are certainly living our motto of "Helping People, Changing Lives." I hear it in the voices of my families that they also feel valued and supported each time I connect with them. I know we will end up stronger as programs and communities because we showed up during this crisis. No one will ever feel that NENAP employees do not care!

I'll end with these quotes:

"A person feels appreciated will always do more than expected." "Leadership is not a position or title, it is action and example." And my personal thank you to you for your leadership!

Sincerely

Linda
